THE MOON ISSUE – A STUPID, BASELESS OPINION OF MORONS

Question

A sheikh says that the correct opinion regarding the moon issue is the position which has been adopted by the Fiqh Council of Northern America and the European Council for Fatwa and Research, which is that the new month shall be decided, not by visual sighting, but by astronomical calculations. Is this correct? Please comment in detail.

ANSWER

A detailed comment and explanation is in the book, Rooyat-E-Hilaal and Astronomical Calculations which consists of 224 pages, by Mujlisul Ulama of South Africa. This book is available on the website as well as in the form of hard copies.

Briefly, it will suffice to say that both the entities mentioned by you consist of morons – *juhala, g hutha* and bootlickers of the Yahood and Nasara. These fellows have yet to educate themselves on the masaa-il pertaining to the ritual acts of Tahaarat and Salaat.

They are too stupid to understand anything about 'fatwa'. Their 'fatwas' are the effluvium of their vain desires. About these moron 'shaikhs' and stupid 'scholars', the Qur'aan Majeed says:

THE MOON ISSUE – A BASELESS OPINION

“Then We have established you on a Shariah regarding affairs. Therefore follow it, and do not follow the vain desires of those who know not. (Such as the juhala shaikhs of these bootlicking entities).”

3 Ramadhaan 1439 -19 May 2018
